

Dana Irvine is a wild child that likes to push the envelope when it comes to driving fast cars, jumping off cliffs and just about anything that makes her adrenaline rush. She remembers the one that got away. They had a brief and meaningful encounter that ended with him gone and her with a hickey that lasted forever. She never thought that a man could affect her like that, but he did. It had been six months since Chris had vacated her life, when she started to see changes in the way that she behaved. Where she was into adventure, she now takes foolhardy risks that makes most people cringe and look the other way. Devon comes into her life and tells her that she has been bitten. He has the cure, but will only give it to her if she performs a couple of tasks. The last one will be to kill the Alpha, namely Chris.. Can she truly kill the man that she supposedly loves for the chance at a normal life? Was it love, or was it the heat due to the wolf lurking within?
