

Surviving Disclosure: A Partners Guide for Healing the Betrayal of Intimate Trust

Drs. Schneider and Corleys groundbreaking 2002 workbook, *Disclosing Secrets*, addressed the impact of disclosure on both addicts and their partners. Their subsequent research showed that the impact of disclosure is very different for partners than addicts. *Surviving Disclosure*, helps partners better understand the trauma resulting from the addicts behaviors and offers a step-by-step guide for how to begin the healing process, prepare for the impact of living with an addict (even an addict in recovery), and deal with shame, anger and fear. The book describes what to tell the children and others, how to promote self-care and well-being no matter what the addict does, and how to set boundaries as part of rebuilding trust. Relationships can heal and partners can thrive after disclosure.
