

# ISO 11078:1994, Aerospace - Aircraft de-icing/anti-icing non-Newtonian fluids, ISO type II

Establishes the requirements for non-Newtonian fluids used in the removal and prevention of frozen deposits of frost, ice and snow on exterior surfaces of parked aircraft and the minimum requirements for an environmental test chamber and test procedure to carry out anti-icing performance tests according to the current materials specification for ISO type II aircraft de-icing/anti-icing non-Newtonian fluids.
