

## Opportunistic Protozoa in Humans: 40 (Advances in Parasitology)

Due to the advent of AIDS, there is currently great interest in opportunistic infections in people with compromised immune systems. This special volume of *Advances in Parasitology* provides a detailed account of the pathogens associated with human enteric diseases, *Cryptosporidium parvum*, *Enterocytozoon bieneusi* and *Cyclospora cayentanensis*. This volume is essential for all parasitologists working on opportunistic protozoa.
