

The Psychology of Hate Crimes as Domestic Terrorism [3 volumes]: U.S. and Global Issues

In this three-volume set, an international team of experts involved in the research, management, and mitigation of hate-motivated violence examines and explains hate crimes in the United States and around the globe, drawing comparisons between countries as well as between hate crimes overall and domestic terrorism. Examines the motivation, actions, and thinking of individuals who commit hate crimes, the effects on victims and society as a whole, and the national and international debates on punishments. Offers guidelines to educate about hate crimes and to serve at-risk populations. Includes vignettes from both perpetrators and victims as well as psychological profiles of hate crime offenders that serve to bring the academic discussions to life. Represents an ideal resource for academic libraries that will be of interest to those studying subjects ranging from sociology to ethnic studies and from law to international studies.
