

## Subjects of the Heart

Three love stories in one volume: A Hazard of the Heart is a story of the power of love, in this life, and the next. A Treasure of the Heart is about two people destined to be together, but have yet to meet each other until Fate intervenes. A Choice of the Heart is a heart-warming story of how love bridges two cultures and gains the trust of a people. The three stories have been previously published as separate volumes.
