

# Recapturing Marxism: An Appraisal of Recent Trends in Sociological Theory

At present, Marxism appears to have a strong footing within American sociology. This collection of essays not only focuses on current efforts to revitalize Marxism, but carefully examines the emerging new establishment within the field. It offers the only existing multidisciplinary critique of recent trends in neo-Marxist theory. Its unique critical approach and current information on debates in Marxist sociology will interest those involved in social theory, Marxism, political economy, and contemporary sociology.
